

BEAVERITE  
World Class Digital Printing Solutions

When was the last time  
your printer asked you to  
**order less?**

**Say goodbye to  
business as usual!**

## Introducing high quality, short-run full-color printing on demand

It used to be that people held onto their collateral materials long after they were outdated. With unit costs lower the higher the production run, they'd print many more brochures than they could ever use. Then they'd watch the usefulness or accuracy of the information expire before the supply.

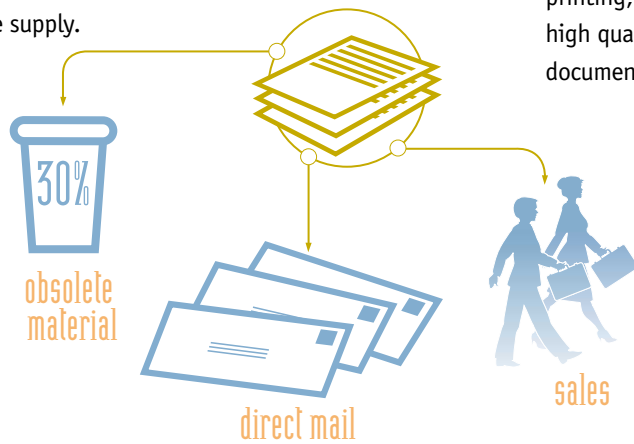

**Not anymore.**

### Now

you can order only the quantity you need, when you need it. Without jeopardizing your cash flow. And without warehousing, waste or obsolescence costs related to unnecessarily large print runs.

Beaverite and ColorCentric, pioneers in the field of demand printing, introduce a digital printing system that delivers high quality, ultra-short run, full-color, always up-to-date documents at a unit cost every business can afford.

# Managing your strategic documents has never been easier or more cost-effective.

## Imagine...

ordering a couple hundred full-color catalogs...

for a direct mail campaign...

changing the content before ordering another 100 pieces...

for an upcoming trade show...

then customizing a couple dozen more...

for a series of sales presentations...

all on the web...

in 2-3 days...

without ever talking to a sales rep on the phone!

## With Beaverite

you can do it, again and again. You get up-to-date, just-in-time, offset-quality printing without paying high prices for the convenience of a short run.

## Not possible?

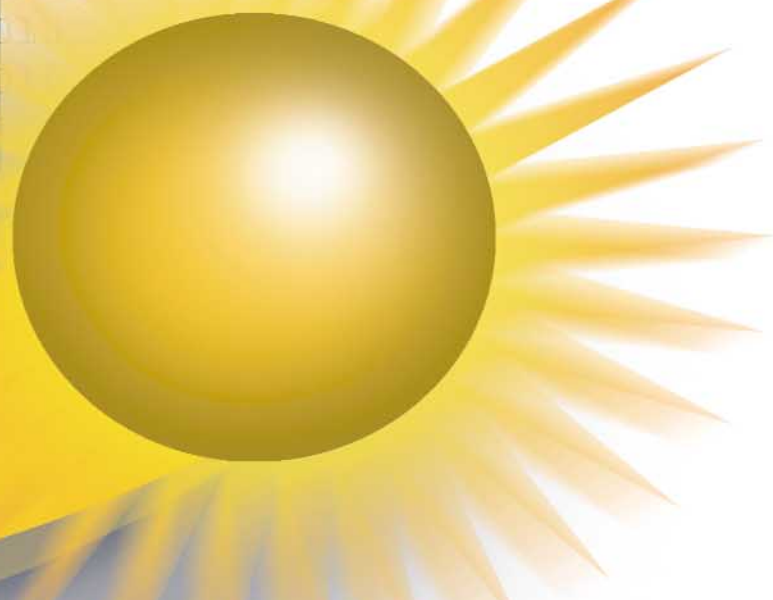

Not only is it possible, it's been proven.

Only 100 copies of this brochure were printed at one time. Our process provides the flexibility to change and customize information in a heartbeat.

Plus, the low cost for a limited quantity helps keep your cash flow under control while giving you the communications materials you need for the immediate tasks on hand. Best of all, we can deliver proofs in two business days and your finished piece within three days.

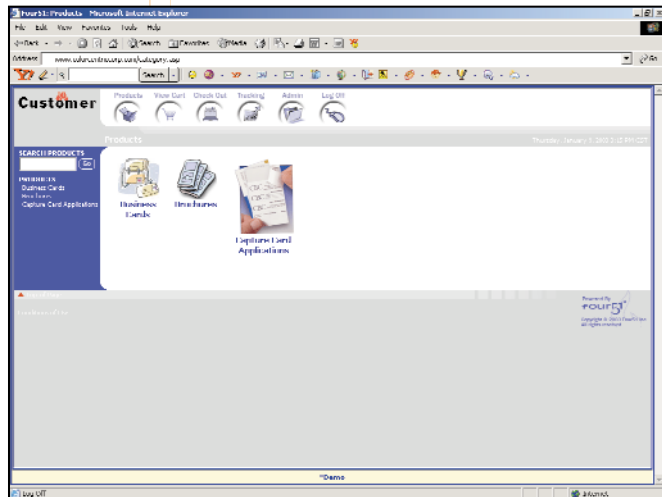

### Order the quantity you need. Your document management strategy will:

- Improve communications
- Increase productivity
- Preserve cash flow
- Eliminate inventory
- Reduce obsolescence
- Decrease waste

## A high quality file management system right on the internet!

We can accept many application files, including PDF, InDesign, Quark, Illustrator, Photoshop, Corel Draw and Pagemaker using the following media: FTP, DVD, CD, disk or email. Our preferred format is PDF, because it eliminates problems such as font incompatibility and color callouts.

It also enables us to provide automated ordering over the Internet from pre-approved web-based documents. If you plan to email a large file to us, we can also create an FTP folder for you. You simply drop the file into the folder, and we'll retrieve it. Want to call up a static document to make changes? No problem. We can archive your work in a secure document library only you can access.

## File to print documents without the difficulty of digital conversions

Digital conversions have always been a problem with demand printing. Not with Beaverite. We've developed our own palette of more than 1,000 colors to choose from, so your printed piece will match exactly the color displayed on the palette.

Our maximum sheet size is 12-by-18." However, we can run up to 20.5-by-14.33" and can print within \_" of the edge of the sheet. Paper weight from 40-to-100-lb. text, up to 140 lb. cover. Finishing capabilities include saddle stitch, spiral or perfect binding.

*Our quality  
is 100% guaranteed.*

Beaverite is an employee owned company (ESOP). Each employee owner takes personal pride in craftsmanship. Pride of ownership translates into quality production. We are ever evolving to serve our customer's needs. Through innovation and quality products, our goal is to become a partner in your process.
